Floor & Wall Tile Adhesive

CATALOGUE

An ISO 9001 : 2015 Certified Company

WILBER was established in the year 2010. Wilber is well-established in the market as one of the best Manufacturers and suppliers of all Construction and Stone care products. It is a professionally managed company under the able leadership of Mr. Arun Kumar Shetty, the promoter. Its operations started from its plant in Jigani and now has grown into three units in Bangalore and one in Jaipur.

Over a period of time, the company has grown from being a domestic supplier to a global supplier by dint of high quality and cost benefit to the customers. The company has its own formulation laboratory and strong technical base to supply with proven quality. The Company has embarked on an ambitious growth program and has adopted Quality Management System and is also certified for process as per ISO 9001: 2015 standards.

Our Mission is to partner with the construction industry as a whole and the Granite, Marble, all Stone and ceramic tile industry by supplying state-of-the-art products to the highest global Standards. We, at Wilber, continuously innovate to give the best to our customers and thus enhance their competitiveness in the world market.

Wilber is backed by strong in-house R&D, certified quality system and our products are made out of proven ingredients.

We are backed by the Motto of **Customer-First** and we provide global service to our customers.

ADESIVA[®]

Floor & Wall Tile Adhesive

EPOXY GROUT SYSTEM

Epoxy Grout System with High resistant, Stain proof, Fine texture & Water proof. User friendly application & Easy to clean. Excellent bond between the tile joints.

Dynamic bonding for all climate

CEMENTITIOUS TILE ADHESIVE

GEL - W 100

With excellent thixotropic fluid properties of the system incorporated with improved stability and strength. Together with high consistency spreading properties with great resistance to settling.

Suitable for Vitrified, Mosaic, Porcelain & all Natural stone tiles on exterior walls & flooring for all sizes including large format tiles.

Available in White colour

MGV - 333

Highly flexible multi-use construction adhesive for fixing vitrified and natural stone tiles of all sizes. Suitable for Vitrified, Mosaic, Porcelain & all Natural stone tiles on exterior walls & flooring for all sizes including large format tiles.

Available in White & Grey colour

GEN - 666

Modified Adhesive with high polymer strength for fixing vitrified and natural stone tiles for floors and walls. Suitable for Vitrified, Mosaic, Porcelain & all Natural stone tiles for flooring & wall cladding for size of tile upto 4ft x 4ft.

Available in White & Grey colour

REG - 999

Polymer modified adhesive for fixing ceramic tiles on floor and walls. Suitable for indoor application. Suitable for Clay, Ceramic Tile, Vitrified for flooring for size of tile upto 2ft x 2ft.

Available in Grey colour

Our high-quality products ensures long-lasting results that won't disappoint

MASTIC

MASTIC is a unsaturated polyester resin based two component product containing mineral filling agents with good workability and having extraordinary bonding and filling properties on Natural and artificial stones. Can be easily applied on horizontal and vertical surface on critical joints with good polishing properties. It preserves good adhesion and the natural appearance on natural stones even at variable atmospheric temperature.

TYPES OF MASTIC: Solid, Liquid

AVAILABLE IN DIFFERENT COLOUR:

- | | |
|-------------------|--------------------|
| Solid White - 120 | Liquid White - 130 |
| Solid Cream - 121 | Liquid Cream - 131 |
| Solid Dark - 122 | Liquid Dark - 132 |
| Solid Black - 123 | Liquid Black - 123 |

Package:
Resin + Hardener (A+B)

Weight per unit:
1.45kg + 50 gms

Sales unit per pack: 6

TRANSPARENT / CRYSTAL MASTIC

Transparent/Crystal is gel/liquid based product which has resistance to UV & uniform colouring with the above properties.

AVAILABLE IN DIFFERENT TYPES:

- Solid Transparent – 110
- Liquid Transparent – 111
- Solid Crystal – 142
- Liquid Crystal – 143

Package:
Resin + Hardener (A+B)

Weight per unit:
1kg + 50 gms (Transparent) / 30 gms (Crystal)

Sales unit per pack: 6

EPOXY ADHESIVE-152

EPOXY ADHESIVE-152 is a Epoxy Resin based two component construction adhesive with gluing and bonding properties to join the faces of natural and artificial stones. This epoxy glue is in gel form can be easily applied on vertical surface. This product provides high creep resistance, low shrinkage, good stability, weather resistance. Suitable for bonding load bearing construction elements.

Package:
Resin + Hardener (A+B)

Weight per unit:
1kg + 500 gms

Sales unit per pack: 3

MARBLE EPOXY-999

MARBLE EPOXY-999 is two component premium product highly fluid in nature, used for filling pores and deep cracks on the surface of marble slab. This fluid form epoxy can easily penetrate into the pore space on the marble surface. It is highly transparent in appearance provides good polishing properties which has excellent coverage and improves the overall quality of the Marble surface.

Package: Resin + Hardener (A+B)	Weight per unit: 2kg + 1kg
Sales unit per pack: 5	

NATURAL STONE BACK SEALER

NATURAL STONE BACK SEALER is a Solvent/Water based premium product, which penetrates deep into the natural stone and it fill-up the pores and pin holes on natural & artificial stone surface, makes it waterproof and protects facades against water and dirt. It is applied on the back portion of the slab before laying on the floor.

Types of Back Sealer: Solvent Base - 300, Water Base - 340

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

WATER REPELLENT/OIL & WATER REPELLENT

WATER REPELLENT/OIL & WATER REPELLENT is a Solvent based premium product which will penetrates deep into the stone surface and fill-up the capillaries. Post curing it prevents the penetration of the liquid based stains and protects other stains on natural & artificial stone surface. It doesn't change the original colour of stone.

Types of Repellent: Water Repellent-310, Oil & Water Repellent-320

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

STAIN PROTECTOR (NANO EFFECT)-330

STAIN PROTECTOR(NANO EFFECT)-330 a high quality organic material based premium product which will penetrate deep into the stone surface and fill-up the capillaries. Post curing it prevents the penetration of the oil, grease and water and has excellent stain repellent, resistance to UV.

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

Our high-quality products ensures long-lasting results that won't disappoint

MARBLE CEMENT CLEANER-200

MARBLE CEMENT REMOVER-200 is a special water based detergent which removes building dirt, and rust from the surface of the marble slabs. It does not contain Hydrochloric acid, free from corrosive fumes. It preserves the structure & colour of the marble surface.

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

CEMENT CLEANER-208

CEMENT REMOVER-208 is a water based detergent which removes residues of cement, building dirt, and rust from the surface of natural / artificial stones / ceramic tiles. It does not contain Hydrochloric acid and free from corrosive fumes. Suitable for cleaning of concrete floors, natural stones & the tiles.

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

TILES CLEANER - 201

Tiles Cleaner - 201 is a water based cleaning agent which removes stain, building dirt and residue on the floor surface of any kind. This cleaning agent free from hydrochloric acid & corrosive fumes. Suitable for cleaning home, workshop and Industry. Can be easily cleaned by wiping with brush, clothes & cleaning abrasives.

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

NEUTRAL CLEANER-230

Neutral Cleaner-230 is a water based cleaner which removes the acid stains and water marks on the floor surface of any kind. For critical stains cycle can be repeated for better result. Can be easily applied by using roller or brush and leave it for 30 minutes there after rinse with water and clean the residues on the floor surface.

Available package: 1litre / 5litre	Sales unit per pack: 6 units in each package
--	--

EPOXY REMOVER-242

EPOXY REMOVER-242 is a solvent based epoxy remover to use on "lumps" and larger epoxy residues, polyester grout, fillers and mastic, enamels and synthetic materials in general deposited on the surface of natural/artificial stones. The product is also able to bare epoxy grouts when necessary.

Available package:
1litre / 5litre

Sales unit per pack:
6 units in each package

UNIVERSAL CLEANER-248

UNIVERSAL CLEANER-248 is water based special cleaner which removes the deposited stains like water marks, oil, scaling, rust on the surfaces of the tiles, natural stones, ceramic articles, faucets etc. It is a highly effective universal cleaner for the floor surfaces of the any kind. It does not change the original colour of the surface and looks clean & shiny.

Available package:
1litre / 5litre

Sales unit per pack:
6 units in each package

PAINT REMOVER-250

PAINT REMOVER-250 is solvent based special product which removes the spilled paint stains on the surfaces of the floor of any kind. It is a highly effective paint stain remover & free from Hydrochloric acid it does not affect the natural look of the floor surface. It can be easily applied with roller & leave it for 10-20 Minutes there after rinse with water by using cleaning brush/abrasive.

Available package:
1litre / 5litre

Sales unit per pack:
6 units in each package

CERA POLISH-450

CERA POLISH-450 is for the polishing treatment of natural stones like marbles, agglomerates and terrazzo. On marbles it enhances the lustre of polished soft stone and eliminates the superficial defects and accents the colour. It acts as a Light protective and stain-resistant on the marble surfaces.

Available package:
1litre

Sales unit per pack:
6 units in each package

Our high-quality products ensures long-lasting results that won't disappoint

SHINER-2000

SHINER-2000 is a solvent based stone care product. It forms a thin shiny layer on the surface of natural stone and results in enhance natural colour. It maintains the soft glow and having high resistance to water and dirt leaves wet-look on stone surface.

Available package: 1litre	Sales unit per pack: 6 units in each package
------------------------------	---

GRANITO COLOUR ENHANCER-400

GRANITO COLOUR ENHANCER-400 is a solvent based stone care product containing reactive modified siloxanes. It forms a thin shiny layer on surface of the natural stone and results in enhance the natural colour of the stone surface. It improves the colour darkness & having high resistance to water and dirt. It resistance to UV and does not allow stone surface turns yellowing. It leaves permanent wet-look on stone surface.

Available package: 1litre	Sales unit per pack: 6 units in each package
------------------------------	---

JET NERO BLACK-460

JET NERO BLACK-460 is a solvent based black colour stone care product containing reactive modified siloxanes. It penetrate deep into the stone surface and fill-up the capillaries and results in enhance natural colour of the stone surface, maintains the lustre of stone surface and having high resistance to water and dirt. It resistance to UV and does not allow stone surface turns yellowing. It leaves permanent wet-look on stone surface.

Available package: 1litre	Sales unit per pack: 6 units in each package
------------------------------	---

UV PROTECTED COLOUR TINT

UV PROTECTED COLOUR TINT are Polyester Pigments used for colouring the all type of mastic so as to match the colour of the natural stone. The pigment dispersions are free from plasticizers. The carrier resin combines chemically with the moulding grade of commercial resin while curing. It exhibit high gloss on the surface having good dispersion properties. And resistance to UV and uniform colouring with excellent coverage.

Available in different colour:
